# Tangled show case

Carolina Wilcke - 2017

---

**Dimensions:**  
86 x 40 x 158 cm WxDxH

**Material:**

The frame is made of solid steel profiles powder coated in black RAL 9005 or taupe RAL 7006. The hardened glass parts are 5 mm thick and available in clear glass or smoked glass. The display case has three glass trays.

The frame is supplied with black screws as standard, available with brass screws on request.

With the design of the Tangled show case, Carolina Wilcke expanded the Tangled series that was introduced in the collection one year earlier. Intriguing and elegant are the 2 doors, that are situated on the side of the show case and close by the use of little magnets. This leaves the front pure and simple, an open view on the treasures that will be presented inside this show case. Also the little door openers match perfectly with this elegant, refined design.
